

June 2019

Community Organizations support Breast Cancer Services

This month Tri-Valley SOCKs donated \$46,000.14 and the Livermore Rodeo, in partnership with Wrangler, donated \$6,000! Both gifts will be supporting breast cancer patients in our community. The funds will be used to provide assistance to patients through the Women in Need fund as well as support the Hospital’s breast cancer nurse navigator, breast cancer education programs, and breast cancer support services. Donations from our community play a critical role in Stanford Health Care – ValleyCare’s ability to deliver the highest-quality care to all who seek our help, close to home. Learn more about the breast cancer program [here](#).

Save the date for the 10th Annual Breast Cancer Symposium: Wednesday, October 23, 5:30 pm, at the Palm Event Center in Pleasanton. More information coming soon!

Celebrating our Nursing Assistants!

In June we celebrated National Nursing Assistants Week. Whether it’s helping patients with daily living tasks, providing psychological support to the patients or their

loved ones, or ensuring patient safety (to name a few things they do), Stanford Health Care – ValleyCare’s amazing Certified Nursing Assistants (CNAs) play a critical role in our ability to provide personalized and compassionate care to patients and support to their loved ones. See more photos of our CNAs on our Facebook page [here](#).

Dr. Lorena Tan Recognized Through the Circle of Care Program

A grateful patient expressed their gratitude for all Dr. Tan does by donating to ValleyCare Charitable Foundation in her honor. “Thanks for being a dedicated and compassionate doctor to us and all your patients,” wrote the donor. Dr. Tan’s approach to medicine is “Listen, care, knowledge.” Learn more about the Circle of Care program and read about

Dr. Tan’s philosophy [here](#).

Honor Someone Who Made a Difference in Your Care Today

New Outpatient Service Offered for Patients with Peripheral Artery Disease

The Stanford Health Care – ValleyCare Cardiac Rehabilitation Department in Livermore is pleased to offer Supervised Exercise Therapy (SET) to patients with Peripheral Artery Disease (PAD). SET is a treatment that involves the

use of intermittent walking exercise, which alternates periods of walking until moderate-to-maximum claudication (pain caused by too little blood flow) with periods of rest. SET has been recommended as the initial treatment for patients suffering from interstitial cystitis, the most common symptom experienced by people with PAD. For more information, please contact the Cardiac Rehabilitation Department at (925) 373-8094.
